Notes:

- (1) Under publications we understand scientific journals, yearbooks, reviews, bulletins and official written communications from the associations of psychomotricity.
- (2) Finland and the Czech Republic do not have a specific journal of psychomotricity but they have connections with other associations to publish their articles.
- (3) Articles concerning psychomotricity are also published in other (inter-) national journals in the field of psychological, pedagogical and rehabilitation sciences.
